Alcohol Advisory Cards are being included in orders to help educate providers and their clients about the risks of alcohol use in pregnancy. Please distribute these cards to your clients. MotherToBaby Utah needs your assistance in identifying funding sources to enable us to continue to provide services as we have for over 35 years. MTB UT has lost 3 of 5 FTE over the past few years and more budget cuts are projected. We are looking for donations, funding partnerships, or staff at your organization to train to be teratogen information specialists. Due to funding cuts, you may experience delays in service.

MotherToBaby Utah employees are working remotely. Orders will be filled as soon as possible as we make trips to the office. Orders sent to expertinfo@mothertobaby.org will help with tracking those orders. We are always looking for women to participate in a variety of observational studies, including well women to participate as controls for comparison groups. These studies help us answer your questions. Our most recent studies are for the COVID-19 disease and vaccines (Pfizer vaccine exposed). These research studies help us learn more about the conditions (asthma, auto-immune conditions, etc.) and medications (albuterol, vaccines, etc.). Thank you.
